

J-ECO PRINT EP-50

ENVIRONMENTALLY-FRIENDLY DISPERSE DYE DIGITAL INK FOR DIRECT PRINTING

J-Eco Print digital inks are ink-jet printing inks especially designed to be used on digital printers having piezo printing heads. J-Eco Print are specific for direct printing on polyester fabrics, used for flags, banners and textile applications. The image is printed on polyester fabrics or mixed synthetic fabrics, containing polyester in a min. quantity of 60% polyester and then thermofixed by means of a press or calendar or vaporized with specific equipment.

ECOCOMPATIBILITY

Free from Alkylphenoethoxylate (APE) according to the EC Directive 2003/53/CE issued on June 18,2003. APE is a chemical product included in the EDC (Endocrine Disrupting Chemicals) list of substances.

MAIN FEATURES

- High quality colours, vivid and brilliant
- Exceptional ink stability
- High light fastness
- High resistance to sublimation
- Excellent image definition after thermofixing treatment
- High saturation grade
- Improved printability with piezo heads
- Fast drying on the fabric
